# FLAME RETARDANTS

## For fabrics, Wood & Other materials

This is a versatile, broad spectrum, odorless, colorless, multi-use, penetrating, Class "A" fire retardant.(For interior use only).

Our pre-mixed product is Easy to use, Non-Toxic, Non-Allergenic and offers superior fire-retardant protection.

UL Classified. Our flame retardant assures a quality controlled, invisible fire retardant ideally suited for economical commercial treatments of:

- Natural fibers
- Synthetic fibers
- Wooden building materials (lumber, etc.) and other wood products
- Upholstery
- Carpeting
- Draperies
- Decorative Products
- Paper
- Displays
- Stage curtains
- Mattresses
- And much, much more...

Correct application rates should be established by a thorough series of evaluations before commercial scale treatment. Application rates may vary with weight, density and the building code for which treated materials are intended to comply with.

It is recommended that all items to be treated should be tested for: Flammability, acceptance, color fastness (dye running), general texture, shrinkage and appearance (i.e. a shiny fabric could be dulled). Make all tests on a scrap or in an inconspicuous area.

Our flame retardant meets and exceeds all requirements to be rated as a fire-retardant by Taiwan acknowledged testing procedures. All specifications and suggestions appearing on our labels and in our literature concerning the use of our product are based upon tests and data believed to be reliable. Since the actual use by others is beyond our control no guarantee, expressed or implied, is made by Shi-Chi. For commercial use only. Not recommended for exterior use.
